Abou-Arab, T. W., 202–206
Al-Jurashi, N. M., 151–160
Ale, B. J. M., 58–64
Alp, E., 139–150
Amyotte, P. R., 102–109
Arendt, J. S., 338–343

Barner, C. L., 93–101
Baronnet, F., 170–175
Baum, M. R., 73–85
Blewitt, D. N., 16–28
Borah, M., 344–347

Caram, H. S., 93–101
Cardillo, P., 242–245, 283–286
Carter, D. A., 68–72
Casal, J., 125–127
Cates, A., 287–296
Cattaneo, M., 283–286
Chatrathi, K., 297–304
Côme, G.-M., 170–175
Continillo, G., 223–229
Crescitelli, S., 223–229

DeGood, R., 297–304
Diener, R., 35–43
Dohnal, M., 317–331

Enayet, M. M., 202–206
Essery, G. L., 44–48

Fisher, H. G., 305–316
Friedel, L., 110–119
Fumo, E., 223–229

Gavrila, G. N. L., 265–271
Glinos, K., 166–169
Goetz, D. D., 305–316
Goyal, R. K., 151–160
Griffiths, R. F., 49–57

Hasegawa, K., 176–184
Hey, M., 217–222
Hirano, T., 260–264

Ishizuka, S., 185–193

Järveläinen, M., 317–331

Kakko, R., 317–331
Kamel, M. M., 202–206
Kashiki, K., 176–184
Kletz, T., 128–129, 207, 277–278
Koivisto, R., 317–331
Kotoyori, T., 120–124
Kottowski, H. M., 194–210

Leclerc-Battin, F., 170–175
Lev, Y., 252–259
Lorenzo, D. K., 338–343

Makhviladze, G. M., 246–251
Marquaire, P. M., 170–175
Matthias, C. S., 139–150
McFarlane, K., 16–28
Mintz, K. J., 102–109
Mudan, K. S., 161–165
Myers, R. D., 166–169

Napolitano, F., 223–229
Nebuloni, M., 242–245
Nielsen, D. S., 236–241
Nielsen, M., 29–34

Papadourakis, A., 93–101
Pegg, M. J., 102–109
Philippov, V. D., 246–251
Pietersen, C. M., 272–276
Prothero, A., 16–28
Puttock, J. S., 16–28

Rao, P. G., 344–347
Rees, F. J., 16–28
Reuzel, P. G. J., 272–276
Roberts, P. T., 16–28
Russo, G., 223–229

Samuels, B., 287–296
Satyanarayana, K., 344–347
Senecal, J. A., 332–337
Sethi, S., 265–271
Skouloudis, A. N., 194–201
Sun, J.-H., 102–109

Trumbore, D. C., 230–235

Vílchez, J. A., 125–127

Wakoh, H., 260–264
Wayne, F. D., 86–92
Webber, D. M., 5–15
Wehmeier, G., 110–119
Wilkie, K. I., 102–109
Wilkinson, C. R., 230–235
Witlox, H. W. M., 16–28
Wolfersberger, S., 230–235
Wolfson Electrostatics Unit, 211–216
Woodward, J. L., 161–165
de Weger, D., 272–276

Subject Index

Accidents
Risk, Runaway, 125–127
Analysis
Hazard, Radiation, 86–92
Asphalt
Explosion, Vapour, 230–235
Atmospheric control
D.s.c., Thermal reactions, 283–286
Autoignition
Explosion, Gas, 170–175

Book Reviews
Friedel, L., 348
Grossel, S. S., 131, 132–133, 133, 279
Harrington, J. M., 132
Kitchin, J. E., 130
Kletz, T., 131

Calorimetry
Decomposition, SADT, 305–316
Thermodynamics, Thermal analysis, 242–245
Case Histories
Kletz, T., 128–129, 207, 277–278
Coal
Dust, Explosion, 102–109
Combustion
Flame front, Geometry, 185–193
Computer analysis
Explosions, Vents, 287–296
Conference Report
Bradford, W. J., 129
Convection
Vents, Fire, 246–251

Decomposition
Calorimetry, SADT, 305–316
Deflagration
Pressure, Explosion venting, 297–304
Diffusion
Gas, Leak detection, 260–264
Dimensional analysis
Modelling, Plant design, 194–201
Discharge rates
Gas, Liquid, 161–165
Dispersion
Gas, Modelling, 151–160
Gas, Turbulence, 29–34
Modelling, Gas, 139–150
Release, Hydrogen fluoride, 16–28
Distillation columns
Relief devices, Valves, 166–169
Droplets
Jet, Two-phase flow, 93–101
D.s.c.
Atmospheric control, Thermal reactions, 283–286
Dust
Explosion, Coal, 102–109
Explosion, Manganese, 332–337
Explosion, Overpressure, 223–229
Explosion, Vents, 217–222

Electrostatic
Hazard, Powders, 211–216
Emergency planning
Hazard, Risk, 44–48
Explosion
Asphalt, Vapour, 230–235
Autoignition, Gas, 170–175
Computer analysis, Vents, 287–296
Dust, Coal, 102–109
Dust, Manganese, 332–337
Dust, Overpressure, 223–229
Dust, Vents, 217–222
Filters, FMEA, 338–343
Runaway reaction, Nitration, 120–124
Explosion venting
Pressure, Deflagration, 297–304

Filters
Explosion, FMEA, 338–343
Fire
Vents, Convection, 246–251
LPG, Spray, 252–259
Fireball
Hazard, Model, 344–347
Flame front
Gas, LPG, 202–206
Geometry, Combustion, 185–193
Flash point
Upper flammable limit, Hazard data, 176–184
FMEA
Explosion, Filters, 338–343

Gas
Autoignition, Explosion, 170–175
Diffusion, Leak detection, 260–264
Discharge rates, Liquid, 161–165
Dispersion, Modelling, 139–150, 151–160
Dispersion, Turbulence, 29–34
Flame front, LPG, 202–206
Geometry
Flame front, Combustion, 185–193

Hazard
Analysis, Radiation, 86–92
Electrostatic, Powders, 211–216
Fireball, Model, 344–347
Release, Modelling, 5–15
Risk, Emergency planning, 44–48
Risk, Policy, 58–64
Hazard data
Flash point, Upper flammable limit, 176–184
Hazardous substance
Risk assessment, Pipework layout, 68–72
Hydrogen fluoride
Mitigation, Release, 35–43
Release, Dispersion, 16–28

Jet
Droplets, Two-phase flow, 93–101

Leak detection
Gas, Diffusion, 260–264
Liquid
Discharge rates, Gas, 161–165
Loss prevention
Valves, Pressure relief, 265–271
LPG
Fire, Spray, 252–259
Flame front, Gas, 202–206

Manganese
Explosion, Dust, 332–337
Mitigation
Hydrogen fluoride, Release, 35–43
Model
Hazard, Fireball, 344–347
Modelling
Dimensional analysis, Plant design, 194–201
Dispersion, Gas, 139–150
Gas, Dispersion, 151–160
Hazard, Release, 5–15
Risk assessment, Release, 317–331
Runaway, SAFIRE, 110–119
Toxicity, Risk assessment, 272–276
Two-phase flow, Validation, 236–241

Nitration
Explosion, Runaway reaction, 120–124

Overpressure
Explosion, Dust, 223–229

Pipework layout
Risk assessment, Hazardous substance, 68–72
Plant design
Dimensional analysis, Modelling, 194–201
Policy
Hazard, Risk, 58–64
Powders
Electrostatic, Hazard, 211–216
Pressure
Deflagration, Explosion venting, 297–304
Pressure relief
Valves, Loss prevention, 265–271
Probit methods
Risk assessment, Toxicity, 49–57

Radiation
Analysis, Hazard, 86–92
Release
Dispersion, Hydrogen fluoride, 16–28
Hazard, Modelling, 5–15
Mitigation, Hydrogen fluoride, 35–43
Risk assessment, Modelling, 317–331
Relief devices
Valves, Distillation columns, 166–169
Risk
Hazard, Emergency planning, 44–48
Hazard, Policy, 58–64
Runaway, Accidents, 125–127
Rupture, Vessel, 73–85
Risk assessment
Pipework layout, Hazardous substance, 68–72
Probit methods, Toxicity, 49–57
Release, Modelling, 317–331
Toxicity, Modelling, 272–276
Runaway
Accidents, Risk, 125–127
Modelling, SAFIRE, 110–119
Runaway reaction
Explosion, Nitration, 120–124
Rupture
Risk, Vessel, 73–85

SADT
Decomposition, Calorimetry, 305–316
SAFIRE
Modelling, Runaway, 110–119
Spray
LPG, Fire, 252–259

Thermal analysis
Thermodynamics, Calorimetry, 242–245
Thermal reactions
D.s.c., Atmospheric control, 283–286
Thermodynamics
Calorimetry, Thermal analysis, 242–245
Toxicity
Risk assessment, Modelling, 272–276
Risk assessment, Probit methods, 49–57
Turbulence
Gas, Dispersion, 29–34

Two-phase flow
Jet, Droplets, 93–101
Modelling, Validation, 236–241

Upper flammable limit
Flash point, Hazard data, 176–184

Validation
Two-phase flow, Modelling, 236–241
Valves
Pressure relief, Loss prevention, 265–271
Relief devices, Distillation columns, 166–169
Vapour
Explosion, Asphalt, 230–235

Vents
Computer analysis, Explosion, 287–296
Dust, Explosion, 217–222
Fire, Convection, 246–251
Vessel
Risk, Rupture, 73–85
